EDUCATION

FAST NUCES (Bachelors in Computer Science)
Govt. Graduate College of Science (F.Sc. Pre Engineering)

Sep 2022 – Dec 2026
Aug 2020 – Aug 2022

TECHNICAL SKILLS

Programming Languages: C++, Python, MySQL, MongoDB, JavaScript, PHP
Web & Technologies: HTML5, CSS3, React.js, Node.js, Express.js, Django.js
Platforms: WordPress, Shopify, Git, GitHub, Docker, Container and Kubernetes

Projects

Tensor Film | Smart Movie Explorer | <https://smart-movie-explorer.vercel.app>

- Next.js Frontend Framework– The project uses Next.js as the primary frontend framework, bootstrapped with `create-next-app`. It leverages modern web technologies including TypeScript (`.tsx` files) and Next.js's App Router for page management and auto-reloading during development.
- AI-Integrated Movie Discovery – This is an AI-powered application designed to recommend movies based on user mood. The intelligent recommendation engine enables personalized movie suggestions, combining user preferences with AI algorithms to match movies to emotional states.
- Vercel Deployment – The application is deployed on Vercel (as shown by the live homepage at `https://smart-movie-explorer.vercel.app`), which provides seamless CI/CD integration with the GitHub repository for automatic deployments on code updates.

Neural Storyteller

- ResNet50 encoder: extracts a semantic feature vector from an image.
- LSTM decoder: turns that feature vector into a word-by-word story/caption.
- Image-to-text pipeline: preprocesses data, trains the model, then generates text for new images.

Game Store DBMS | PHP, MySQL, JavaScript

- Designed and implemented a full-stack game store management system.
- Developed secure authentication, relational schema design, and inventory management.
- Implemented order tracking and dynamic UI components.

WordPress Shoe Store Website | WordPress, WooCommerce

- Developed a functional e-commerce website with product catalog and cart system.
- Integrated secure payment solutions and customized themes/plugins.
- Optimized website performance and SEO.

Achievements

Specialization: IBM Full Stack Developer: Including

1. React 2. Git & GitHub 3. Node and Express 4. Python for Data Science 5. Containers and Kubernetes 6. SQL & Django

INTERESTS

Chess, Fitness Training, Gaming, Continuous Learning in Software Development
